

Par Olive – Pearl Marine Collagen (Unflavoured)

Short Description

Experience firm skin, thick hair and strong nails with PEARL Marine Collagen. This formula is Dermatologist developed, Australian made, MSC Sustainably sourced and hydrolysed down to the lowest molecule weight for maximum absorption to stimulate fresh collagen production.

Long Description

PEARL Marine Collagen Superpowder (Unflavoured) is a potent beautifying formulation of wild-caught Norwegian marine collagen, freshwater pearl powder & organic native Australian Kakadu plum.

All active ingredients work synergistically to protect your cells from accelerated ageing by stimulating fresh collagen production to promote firm skin, thick hair and strong nails. Their clinically proven formulas are developed by a leading Australian Dermatologist and Dietician with traceability and sustainability at the forefront, and are always free from 'natural' and artificial flavourings and fillers.

Size

Jar: 150g, Refill: 150g, Travel: 70g

Directions for use

Add 1 - 2 tsp. PEARL Marine Collagen Superpowder (Unflavoured) to coffee, tea, smoothies, oatmeal, chia pudding or baked goods.

Ingredients

Wild-caught Norwegian collagen: PEARL's collagen is the most premium grade available, sourced from the skin of deep sea cod wild caught in the crystal clear waters of the North Atlantic ocean off Norway. PEARL offers the purest source of 100 percent natural collagen peptides on the market. Research shows our bodies absorb wild caught marine collagen around 1.5 times more efficiently than bovine (cattle-derived) collagen, which is commonly used by other brands. Wild-caught marine collagen also has a particularly high content of glycine, proline, and hydroxyproline. These amino acids stimulate cells in the skin, bones and connective tissues to produce new collagen.

Freshwater pearl powder: This legendary beauty ally has powerful anti-ageing and antioxidant properties, and is one of the richest sources of calcium on the planet; over 80 percent by weight. Our pearl powder, sourced from sustainable freshwater farms, is also rich in zinc, magnesium and essential trace minerals such as selenium and silicon. Pearl

powder is proven to help stimulate the body's natural production of collagen, strengthening hair, skin and nails.

Australian Kakadu plum: The homegrown native superfood is the richest source of Vitamin C in the world. Containing more than five times the antioxidant content of wild blueberries, Kakadu Plum is an antioxidant powerhouse that protects the skin from free radical damage and environmental aggressors. Vitamin C is also imperative for maximum collagen absorption, which is precisely why Kakadu plum is a hero ingredient in our Marine Collagen Superpowder.
